

SUNDAY AFTERNOON AT THE LIBRARY PRESENTS:

MAR. 18, 2018
2:00-4:00 PM

Pender Island Public Library

Dr. Peter Pare

Gene Editing: The Potential! And Threat?

New technology enables us to change the genome of an organism. New genes can be added, and existing genes removed. While potential benefits in medicine and agriculture may be relatively clear of controversy, when it comes to altering the human genome, immense ethical concerns arise. Peter will explain in layperson's terms the workings and uses of this powerful technology and encourage discussion of the pressing and puzzling ethical questions that swirl around it.
